EXPERIMENT 1: Use Figma to create an interactive diagramillustratingthe components of a basic cellular system.

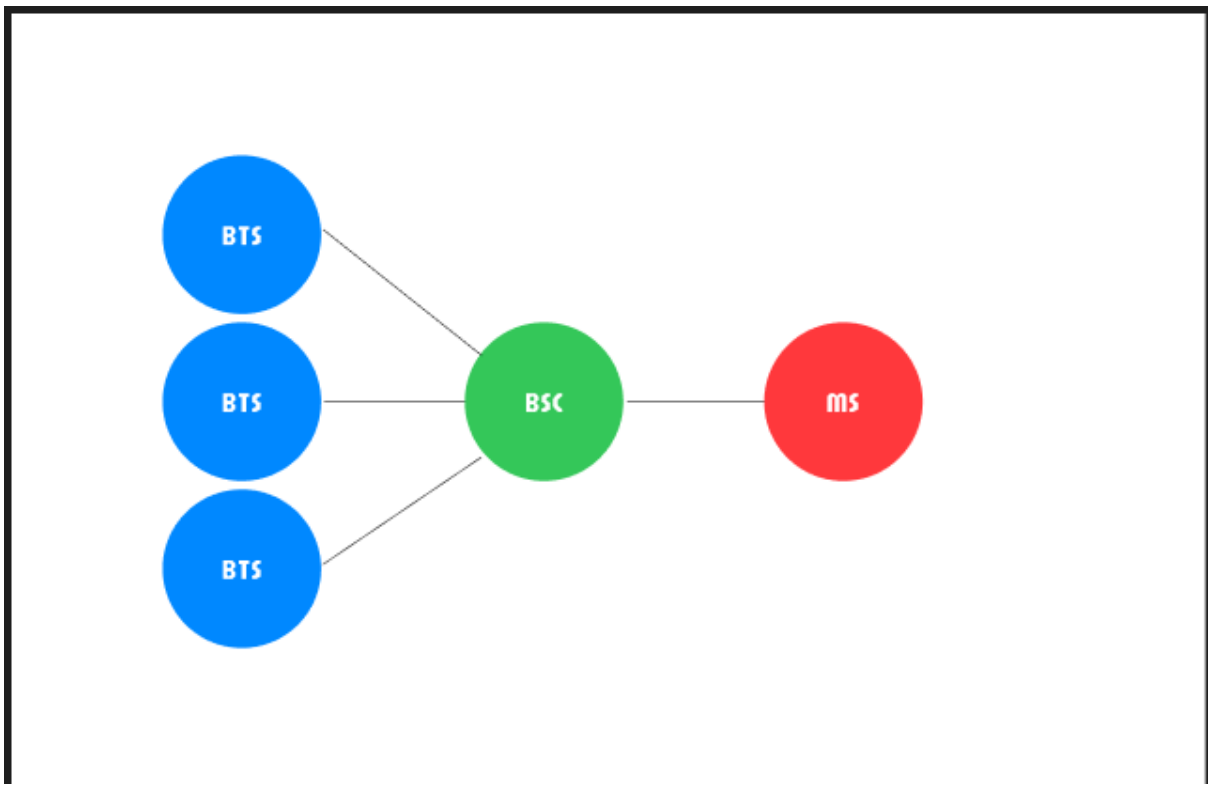

Aim:

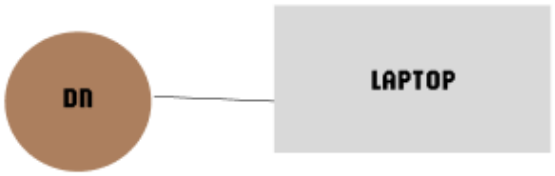

To create an interactive diagram illustrating the components of a basic cellular system.

Procedure:

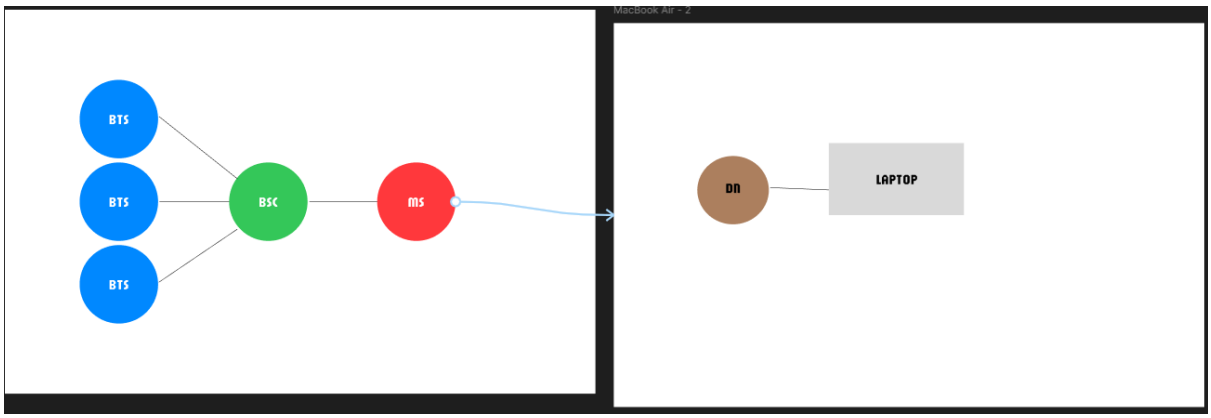

1. **Insert Frame:** Create a desktop frame named Desktop 1.
2. **Draw Blocks:** Draw four vertical rectangular cards on the left.
3. **Add Acronyms:** Label them MS, BTS, BSC, and MSC.
4. **Create Button:** Draw a circular VIEW DETAILS button on the right.
5. **Duplicate Frame:** Duplicate it and name the new frame Desktopdetails.
6. **Expand Cards:** Resize cards into wider horizontal boxes.
7. **Add Content:** Insert full component names and functional descriptions.
8. **Draw Links:** Add vertical connecting lines between the cards.
9. **Link Frames:** Connect the VIEW DETAILS button to Desktopdetails in Prototype mode.
10. **Test Flow:** Set to On click -> Smart Animate and click Present.

Design:

Prototype:

Result:

The interactive diagram of a basic cellular system was successfully created in Figma. The final prototype features a functional, smart-animated transition that smoothly expands the high-level acronym nodes (MS, BTS, BSC, MSC) into detailed, interconnected functional descriptions upon clicking the "VIEW DETAILS" button.

EXPERIMENT 2: Design a user interface prototype for a mobile station using Figma, considering connectivity and convenience.

Aim:

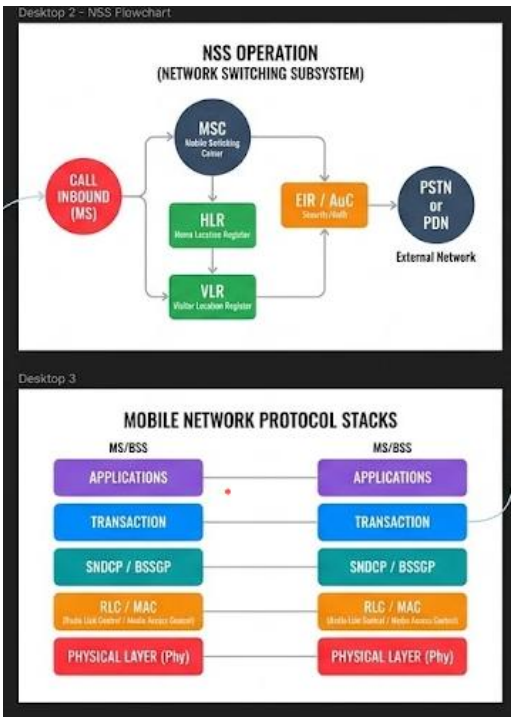

To create an interactive diagram illustrating the components of a basic cellular system.

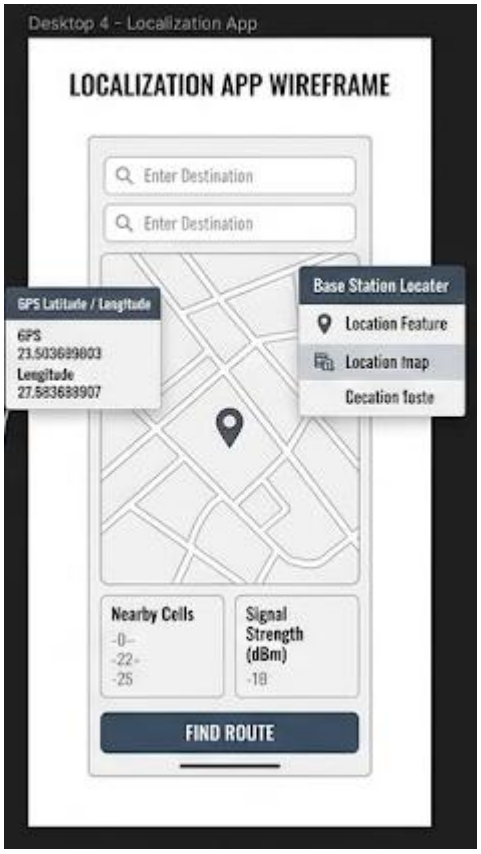

Procedure:

1. **Insert Frame:** Create a desktop frame named Desktop 1.
2. **Draw Blocks:** Draw four vertical rectangular cards on the left.
3. **Add Acronyms:** Label them MS, BTS, BSC, and MSC.
4. **Create Button:** Draw a circular VIEW DETAILS button on the right.
5. **Duplicate Frame:** Duplicate it and name the new frame Desktopdetails.
6. **Expand Cards:** Resize cards into wider horizontal boxes.
7. **Add Content:** Insert full component names and functional descriptions.
8. **Draw Links:** Add vertical connecting lines between the cards.
9. **Link Frames:** Connect the VIEW DETAILS button to Desktopdetails in Prototype mode.
10. **Test Flow:** Set to On click -> Smart Animate and click Present.
